

Tamara Wernli presents Telebasel News 7vor7 - Miroslaw Magola alias Magnetic Man.
Telebasel is a Swiss television channel based in Basel.

Nina Kulagina, Eusapia Palladino, Swami Rama and Miroslaw Magola are some of the famous people who have claimed and demonstrated telekinetic abilities. (Wikipedia source)

Prof. Alex Schneider President of the Basler Psi-Tage Convention Switzerland and member of the Schweizer Parapsychologischen Gesellschaft invited Miroslaw Magola to PSI- Tage.

Nobel Prize laureates Albert Einstein and Brian Josephson and co-author Fotini Pallikara-Viras proposed that both psychokinesis and telepathy might be explainable using quantum physics. Their scientific paper "Biological Utilization of Quantum Nonlocality" stated that earlier researchers were correct in the conscious and creative mind's potential to affect the statistical outcomes of quantum phenomena.

Then there is the longstanding notion that our minds are mostly underutilized wonder machines. It is widely believed that we only use roughly ten percent of our brains. This would suggest that the untapped 90 percent is a realm of extrasensory powers and abilities, making it seem as if every human is simply a frustrated X-man.

There are two basic metrics researchers use to describe measuring the effects of supposed psychokinetic effects during experiments, Micro-PK and Macro-PK. Micro-PK requires scientific equipment to observe the manipulation of atoms, molecules and subatomic particles. Macro-PK describes any large-scale effect that can be seen with the naked eye.

Haakon Forwald, a Swedish electrical engineer, promoted the idea that a person could manipulate gravitational fields by mentally agitating the atoms and neutrons inside an object. Gerald Feinberg, a Columbia University physicist, futurist and author invented the idea of the tachyon, a theoretical particle that moves faster than the speed of light and could, possibly, explain psychokinesis.

The world of science gave Miroslaw Magola alias Magnetic Man credit for the fact that, whilst working on the most interesting processes of psi-creation, he did not drown completely in this work or isolate himself in the practical side, but found fundamental explanations, described possible mechanisms related to many natural phenomena - a natural phenomenon involving the physical properties of matter and energy, Quantum mechanics also known as quantum physics, or quantum theory) is a fundamental branch of physics which deals with physical phenomena at nanoscopic scales where the action is on the order of the Planck constant , brain research - the conscious mind determines the actions, the unconscious mind determines the reactions, and the reactions are just as important as the actions and gave an all-embracing picture of telekinesis.

Dr. Michio Kaku is the author of several widely acclaimed science books, including Parallel Worlds, Visions, Beyond Einstein, Hyperspace and Physics of the Impossible, the basis for his Science Channel TV show, Sci Fi Science: Physics of the Impossible and the host of two radio programs, Explorations and Science Fantastic said in his latest work, The Future of the Mind, uses his brand of theoretical physics - a beguiling mix of quantumness and consciousness - to push past the current frontiers of neuroscience. The worlds media spoke with this bravely

unusual mind about where today's most daring scientific research is taking our brains. Our sit-down adventure included storied science notions like telekinesis, implantable knowledge, memory erasure, and even sentient robots.

Miroslaw Magola in the World Media like the ITV "Beyond Belief" hosted by BBC broadcaster Sir David Frost who became known for his television interviews with senior political figures, among them The Nixon Interviews with former United States President Richard Nixon in 1977, which were adapted into a stage play and film, "Beyond Belief - Fact or Fiction" or "X-Factor" an American television anthology series created by Lynn Lehmann, presented by Dick Clark Productions, aired by the Fox network, Discovery and History Channel- "Stan Lee's Superhumans - Mind Force" hosted by Stan Lee and Daniel Browning Smith (Magneto, X-Men), German TV ProSieben - Galileo "Magnet Mann" hosted by Aiman Abdallah and Stefan Goedde and "Arabella" hosted by Cosima Arabella Kiesbauer, known professionally as Arabella Kiesbauer and TV Sat.1 "Clever - The incredible forces of nature!" hosted by Wigald Boning and Barbare Eligmann produced by Constantin Entertainment, RTL2, France Channel TF1 "La Soirée de l'Etrange" - Night of the Strange - hosted by Christophe Dechavanne and Patrice Carmouze produced by Coyote, TV SRT - Swiss Radio and Television – Alex Schneider PSI Tage and TV telebasel "7vor7" Albert Einstein - The theory of relativity, Fuji Television (Japan) „Unbelievable, China Television CCTV and History India Channel - Superhuman,

Newspaper: The Huffington Post - Miroslaw Magola claims he's a human magnet, Daily Mail - Meet the real life Magneto - German psychic claims he uses telepathic powers to manipulate metal just like X-Men supervillain, Journal of Parapsychology, Psychology Today. Many books, blogs and social media are featuring and writing about Miroslaw Magola who have the ability to attract objects to his body.

We will see soon Kim Min Joon and Magnetic Man on new documentary on Arirang Channel.

The James Randi Educational Foundation was not able to accept Miroslaw Magola proposal testing him on Live TV Programm.

Master magician and escape artist Harry Houdini hammered home one of the final nails in the coffin for telekinetic mediums. Houdini's book is a detailed excoriation of their claims of supernatural powers.

The Original Telekinetics

Historical, religious, mythological, and fictional characters have been moving things with their mind for millennia. Take Shakuni, for example. This key character in the Sanskrit epic "Mahabharata" telekinetically manipulates the dice in a crucial game to alter the outcome in his favor, kicking off the main plot of one of two the major Sanskrit epics of ancient India, as well as the Hindu age of Kali Yuga. Perhaps the first telekinetic, Shakuni reshaped history with his mind back in 400 BC

And then there's the most famous telekinetic of them all—Jesus. What was Jesus doing in the Bible if not using telekinesis to turn water into wine, heal the sick, and change a little bit of food into a lot? It's probably a good time to mention that telekinesis, later known as psychokinesis (PK), is an umbrella term for a slew of special abilities that include biological

healing and the transmutation of matter, two abilities Jesus displayed in the above examples. Also bundled under the umbrella term psychokinesis is supernatural healing, which sounds a lot like what Jesus was doing when he brought Lazarus back from the dead.

Long before there was Gandalf, there was the telekinetic wizard Merlin, from the legend of King Arthur. According to the Arthurian legend of the 12th century, Merlin's telekinetic powers were so abundant he sailed through the ocean in a glass house and, to really lay his telekinetic powers on thick, transported Stonehenge across the Irish Sea from Ireland to England.

Metaphysics expert Dr Ellie Crystal said: 'Everyone has the potential to be able to be telekinetic. "Telekinesis is created by higher levels of consciousness. It cannot be created by "wishing it" to happen on the physical level. The energy to move or bend an object is created by a person's thoughts created by their subconscious mind. " The history of telekinesis and scientific studies. The mystery behind ESP and telekinesis. Is telekinesis possible ? Telekinesis definition: The movement or change of physical objects without the application of physical force, mind over matter.

Hollywood Telekinesis and Psychokinesis Movie List:

Will Power, Pearl White, Chester Barnett, Joseph Belmont (silent film; see general list below for plot).

Project X, Christopher George, Monte Markham.

Carrie, Sissy Spacek, John Travolta, Amy Irving, et al.

The Spell, Susan Myers, Helen Hunt, Lee Grant.

The Initiation of Sarah, Kay Lenz, Robert Hays.

The Fury, Kirk Douglas, Andrew Stevens, Amy Irving.

Jennifer, Lisa Pelikan, Nina Foch, Jeff Corey.

The Medusa Touch, Richard Burton, Lee Remick.

Patrick, Robert Thompson.

Harlequin, Robert Powell, David Hemming, Broderick Crawford.

Patrick Still Lives, Gianni Dei. (Italian sequel)

Scanners, Michael Ironside.

Kiss Daddy Goodbye, Nell Regan, Patrick Regan III.

The Sender, Zeljko Ivanek, Kathryn Harold.

Firestarter, Drew Barrymore, Martin Sheen, George C. Scott.

Scanners II: The New Order, David Hewlett.

Scanners III: The Takeover, Lilian Komorowska.

The Lawnmower Man, Jeff Fahey, Pierce Brosnan.

Scanner Cop, Daniel Quinn, Richard Lynch.

Scanners: The Showdown aka Scanner Cop II, Daniel Quinn.

Phenomenon, John Travolta, Kyra Sedgwick, Robert Duvall, et al.

The Rage: Carrie 2, Emily Bergl, Amy Irving.

Project Human Weapon aka Mindstorm, Judge Reinhold, William Zabka.

X-Men, Ian McKellen, Famke Janssen, et al.

Firestarter 2: Rekindled, Marguerite Moreau, Malcolm McDowell, Dennis Hopper (TV movie sequel).

Carrie, Angela Bettis, Emilie de Ravin (TV movie remake).

Momentum, Louis Gossett Jr, Teri Hatcher, Grayson McCouch.

Phenomenon II, Christopher Shyer, Jill Clayburgh (made-for-TV movie).

X 2: X-Men United, Ian McKellen, Famke Janssen, et al.

Sidekick, David Ingram, Perry Mucci.

X-Men: The Last Stand, Ian McKellen, Famke Janssen, et al.

The Echo Game, Alisha Seaton, Jeannie Bolet, Melissa Lee, et al.

Push, Chris Evans, Dakota Fanning, et al.

X-Men: First Class, Michael Fassbender, James McAvoy, et al.

Chronicle, Michael B. Jordan, Michael Kelly, Alex Russell, et al.

Red Lights, Robert De Niro, Sigourney Weaver, Cillian Murphy, et al.

Looper, Joseph Gordon-Levitt, Bruce Willis, Emily Blunt, Pierce Gagnon, et al.

The Wolverine, Hugh Jackman, Famke Janssen as telekinetic Jean Grey in dream sequences and Ian McKellen as Magneto in a post-credits scene.

Carrie, Chloe Moretz, Julianne Moore (new version again based on the Stephen King novel).

Patrick, Jackson Gallagher (remake of the 1978 film by the same producer).

A Telekinetic Surprise in a Coffee Shop, Andrea Morales (official promo prank video for the 2013 Carrie movie). YouTube CINEMOVIE.TV

Powerplegic, Shan Agish.

X-Men: Days of Future Past (a sequel to 2011's X-Men: First Class, but also including many of the stars of the original X-Men movies).

Lucy, Scarlett Johansson, Morgan Freeman, Amr Waked, et al.

Life Raft (found footage story, directed by Todd Colby Pliss) IMDb
